## **Powerwall 3**

### **Power Everything**

**Powerwall 3** is a fully integrated solar and battery system designed to accelerate the world's transition to sustainable energy. Customers can receive whole home backup, cost savings, and energy independence by producing and consuming their own energy while participating in grid services. Once installed, customers can manage their home energy system using the Tesla App and customize system behavior to meet their energy goals.

Powerwall 3 achieves this by supporting up to 20 kW DC of solar and providing up to 11.04 kW AC of continuous power per unit. It has the ability to store up to 13.5 kWh of energy and start heavy loads rated up to 185 A LRA, meaning a single Powerwall 3 can support the power needs of most homes.

Powerwall 3 is designed for fast and efficient installations, modular system expansion, and simple connection to any electrical service. With multiple Powerwall 3 units and/or **Powerwall 3 Expansions**, it is easier and more affordable to scale up customers' systems to meet their current or future needs.
